

I truly value my K-Love radio station. I don't really like how other stations will discuss subjects that are vulgar, sexual in content, or inappropriate for younger children to listen to. I'm not implying that the other stations need to be eliminated, I just appreciate having the option of listening to a radio station that is positive and encouraging. I know that I don't need to put a lot of thought into what is being said when I have young people in my car who are so easily influenced by what is said and what they are hearing. I know that all of the news, conversation, and songs are family friendly. Honestly, this type of radio station is what I choose to listen to...it is a choice, but if K-Love were to be taken off of the radio, I (and many others) would not be given the choice. I don't think that I would be listening to any of the other stations on the radio, but I will probably pop in a few more cd's and listen to music that I enjoy, I won't have to suffer through all of the commercials, and I don't need to filter the language that I don't appreciate and subject matter that is better left for the locker room. Thank you for taking the time to read my comments.
